response to stress as affected by brainstem lesions in rats, 347
studies on the possible inhibitory effect of corticosterone on corticosteroidogenesis, 379
production and catabolism of cortisol following administration of thyroxine analogues, 389
distribution of pantothenate in rat adrenal after ACTH, 547
effect of hydrocortisone and epinephrine on glucose uptake by rat diaphragm, 650
extra-adrenal sources and regulation of plasma ascorbic acid during hemorrhage and visceral ischemia, 688
liver phosphorylase in normal and adrenalectomized dogs treated with serotonin, 693
effects of ablation on urinary excretion of 5-hydroxyindole acetic acid in rats, 717
in vitro production of corticosteroids by chicken adrenal, 719
gluconeogenesis and pyruvate metabolism in rat kidney, *in vitro*, 744
accelerated appearance of DCA hypertension in rats treated with pitressin, 752
acute effects of corticosteroid mixtures and the spirolactone SC-8109 on Na, K and H_2O excretion in adrenalectomized, water-loaded rats, 807
relative sensitivity of adrenal ascorbic acid and corticosteroid responses to ACTH in rats, 873
Adrenocorticotropin
adrenal weight-maintaining factors other than ACTH in a beef pituitary extract, 1
effect of electrical stimulation of limbic system on secretion of, 319
distribution of pantothenate in rat adrenal after treatment with ACTH, 547
in vitro effects of GH and ACTH on amino acid transport in isolated rat diaphragm, 708
relative sensitivity of adrenal ascorbic acid and corticosteroid responses to ACTH in rats, 873
Aldosterone
interaction with cholesterol in *in vitro* biosynthesis of estroprotein, 526
Alloxan
some changes of appetite following injection of, 285
Androgen
anti-androgenic activity of dihydroisosteviol, 282
study of cock's comb in normal and treated birds, 430
biological activity of methyltestosterone enol ethers, 521
biological activity of a phenanthrene derivative, 724
comparative myotrophic and N retaining effects of several steroids, 849
5α-androstane—an androgenic hydrocarbon, 887

Bone
cage layer osteoporosis, 879

Estrogens
effect of estrone and parathyroid extract on bone citrate metabolism, 166
metabolism of, in pregnant mare, 276
isolation and identification of estriol glucosiduronate in human meconium, 500
interaction of aldosterone and cholesterol in *in vitro* biosynthesis of estroprotein, 526
in ovarian fluids of normally menstruating women, 698
progesterone-induced prolongation of vaginal response of spayed rats to estrogen with remarks on other putative estrogen antagonists, 722
evaluation of enzymatic hydrolysis of estrogen conjugates, 815
comparison of uterotrophic activities of various steroids with their utilization in *in vitro* estrogen biosynthetic systems, 843

Glucagon
effect on hindquarter blood flow in dog, 132
site of origin of a hyperglycemic substance liberated into the pancreatoduodenal blood by deserpidine, 248
function as effected by adrenal medulla, 337
duration of effect, 774
Gluconeogenesis
and pyruvate metabolism in rat kidney, *in vitro*, 744
Glucose metabolism
of endocrine tissues, studies of pathways, 801
carbohydrate metabolism in pregnant rat, 862
Growth hormone
effect of dosage on plateauing in adult female rats receiving growth hormone, 170
effect on removal by lavage of Ca and Sr from skeleton of rat, 535
modification of degenerative joint disease in mice, 540
in vitro effects of GH and ACTH on amino acid transport by isolated rat diaphragms, 708
and the hypothalamus, 760

Hypophysis
basis for a tentative theory of the corpus luteum-pituitary relationships, 9
luteotrophic activity of homotransplanted pituitaries in intact rats, 48
role in conversion of folic acid to citrovorum factor, 90
concerning oxytocin effect on LTH secretion, 122
effect of dosage on plateauing in adult rats receiving growth hormone, 170
excess growth in tadpoles after transplantation of the adenohypophysis, 457
inhibition of gonadotropins and oxytocin by extracts of *Lithospermum*, 583
effect of hypothalamic lesions on secretion of LTH, 597
effect of pituitary extracts upon serum lipids of rabbit, 784
studies of pathways of glucose metabolism of endocrine tissues, 801
Hypothalamus
effect of lesions on ovarian function in ewe, 179
initiation of lactation following placement of lesion in, 270
effect of lesions on secretion of LTH, 597
and growth, 760

Insulin
turnover of I^{131}-insulin in the pregnant rat, 862
maintenance of diabetic hamsters, 878
Iproniazid
retardation of sexual development in female rats, 511

Lactation
compensatory ovarian hypertrophy during pseudopregnancy and lactation in rats, 42
initiation in rabbits after placement of hypothalamic lesions, 270

Mammogen
mammogenic activities of the midgestational mouse placenta, 884

Neurohypophysis
activity of hormone from a marsupial and a monotreme, 137
oxytocic substance in extracts of semen, 187
Nutrition
role of reducing agents, adrenal glands

and pituitary glands on conversion of folic acid to citrovorum factor, 90

Ovary
basis of a tentative theory of corpus luteum-pituitary relationship, 9
compensatory hypertrophy during pseudopregnancy and lactation in the rat, 42
luteotrophic activity of homotransplanted pituitaries in rats, 48
does oxytocin stimulate secretion of luteotrophin?, 122
effect of hypothalamic lesions on ovarian function in ewe, 179

Pancreas
site of origin of a hyperglycemic substance following deserpidine injections, 248
Parathyroid
hormone-like activity in sera of rats with induced hyperparathyroidism, 82
extract and estrone action on bone citrate metabolism, 166
localization of the renal tubular action of hormone of, 266
effect of deficiency on reproduction in rats, 467
direct renal action of purified parathyroid extract, 570
a comparison of renal calcification produced by parathyroid extract or calcium gluconate, 733
Pineal
a microscopic bioassay for melatonin, 443
Progesterone
comparative effectiveness of progestagens on development of deciduomata, 281
induced prolongation of vaginal response of sprayed rats to estrogen, 722
Prolactin
and the photoperiodic testicular response in White-crowned sparrow, 279
mammogenic activities of the mid-gestational mouse placenta, 884

Relaxin
bioassay using direct measurement of interpubic ligament formation in mice, 102
effect on uterine phosphorylase in rats, 663
interpubic ligament regression in relaxin-treated mice, 668

Semen
oxytocic substance in extracts of, 187
Serotonin
liver phosphorylase in normal and adrenalectomized dogs treated with serotonin, 693
influence of adrenalectomy on urinary excretion of 5-hydroxyindole acetic acid in rats, 717
Steroids
biological activity of C-9 and C-11 substituted derivatives of Δ^4-androstene-3, 17-dione, 116
some biological properties of a perhydrophenanthrene derivative, 394
comparative myotrophic and N retaining effects of several steroids, 849

Testis
prolactin and photoperiodic testicular response in White-crowned sparrow, 279
seasonal variation in serum and testis cholesterol content, 311
Thyroid
biphasic effect of TSH on thyroidal iodide collection in rats, 70
utilization of radioiodine in sparrow and weaver finch, 153
effect of trypan blue on function of, in rat, 204
mechanism of action of trypan blue in suppressing function of, 212
effect of oral hypoglycemic agents on thyroid function in rats, 293
effects of TSH upon intrathyroidal metabolism of thiocyanate-S^{35}, 325
effect of thiocyanate, stable iodide and perchlorate on kinetics of radioiodide transport, 332
thyroxine deiodination by a microsomal preparation requiring Fe^{++}, oxygen and cysteine and glutathione, 353
role in production of hypermetabolic state occurring in rats with full-thickness burns, 363
thyroxine-serum protein complexes, 368
the binding to serum protein of acetic and propionic acid analogues of thyroxine and triiodothyronine, 407
purification of thyroid proteases by cellulose column chromatography, 413
conjugates of triiodothyronine and its metabolites, 419
effect of propylthiouracil on thyroxine-TSH interplay, 451

effect of deficiency on reproduction in rats, 467
metabolism of 3:5 diiodo-L-thyronine on L-amino acid oxidase, 484
effect on removal of Ca and Sr from skeleton of rat, 535
the metabolism of tetraiodothyroformic-I^{131} acid in the rat, 563
plasma I^{131}-thyroxine in hypophysectomized rats injected with radioiodide, 609
growth response of thyroidectomized rats to high levels of iodide, 619
failure to demonstrate extrathyroidal thyroxine formation in thyroidectomized rats on low and moderate iodine intakes, 635
inorganic oxidation products of I^{131} formed in biological systems, 657
radioautographic studies on the ultimobranchial body and thyroid gland in vertebrates, 674
tetraiodothyropropionic acid and yeast respiration, 725
proteolysis in phosphate-purified thyroglobulin, 829
normal I^{131}-L-thyroxine metabolism in presence of potassium perchlorate and interrupted by propylthiouracil, 855
uptakes by human beings following orally administered NaI^{131} solutions, 875
synthesis and chromatography of pyruvic acid analogues of thyroid hormones, 880

Thyrotropin
inhibition by immunologically specific antiserum, 273
effect on intrathyroidal metabolism of thiocyanate-S^{35}, 325
influence of propylthiouracil on thyroxine-TSH interplay, 451

Uterus
micro-determination of carbonic anhydrase in, 551
effect of relaxin on phosphorylase in uterus, 663
carbonic anhydrase activity in rat uterine tissues, 728
comparison of uterotrophic activities of various steroids with their utilization in *in vitro* estrogen biosynthetic systems, 843
